

Technically advanced and innovative weighing solutions for “Granite Industry”

Granite Block Weighing System

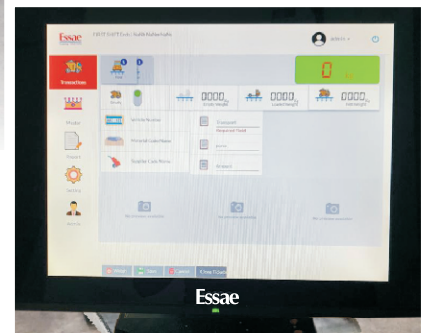

GRANITE BLOCK WEIGHING SYSTEM

- Designed to meet safety of life at sea (**SOLAS**) Verified Gross Mass (**VGM**) and **NAHI** Regulations
- Place and use ready weighing system for granite blocks
- Approved by legal metrology department
- Available in customized sizes and capacities
- Exact quantity of block can be loaded into truck
- Protect profits by paying for the right weight
- Full transparency of each blocks
- No weight disputes with suppliers / customers thereby building long trust
- Saves time and fuel for truck travelling to public weighbridge location

Technically advanced and innovative weighing solutions for “Granite Industry”

Granite Block Truck Weighing System

HT ORTHOTROPIC WEIGHBRIDGES

- Innovative **orthogonally isotropic** modular design
- Designed for **CLC** concentrated load capacity of 40,000kg
- Fabricated using **410MPa** high tensile steel compared to **250MPa** mild steel
- Fully welded modules using high tensile welding wires offers rigidity to platform
- Modular concept to offer easy installation, mobility and platform extension
- A sleek design requires shorter ramps.
- Design proof checked and approved by Indian Institute of Technology (IIT)
- Raft foundation helps in low cost of ownership

Essae Digitronics Private Limited

An ISO 9001 : 2015, ISO 14001 / OHSAS 18001 and ISO / TS 16949 Certified Company
